

ElcomSoft Releases a Free Facebook Password Recovery Tool

Moscow, Russia – June 2, 2011 – ElcomSoft Co. Ltd. announces the release of Facebook Password Extractor, a free tool to recover passwords to Facebook accounts that are stored or cached in popular Web browsers. Supporting the latest versions of Microsoft Internet Explorer, Mozilla Firefox, Apple Safari, Opera and Google Chrome, Facebook Password Extractor can reveal login information for multiple Facebook accounts in just a click.

Background

Logins and passwords to various Web resources are routinely stored or cached in Web browsers to speed up access to protected resources. While it is possible to extract cached passwords from each of the popular Web browsers, it's never been an easy task. Mozilla Firefox, Apple Safari, Opera, Google Chrome and older versions of Microsoft Internet Explorer (v. 6 and earlier) use lighter security models that are easier to work with. However, Internet Explorer 7, 8, and 9 employ an all new, enhanced security model that makes extracting a cached password impossible without knowing the exact authorisation URL.

[Facebook Password Extractor](#) is the first free tool on the market to help users recover lost and forgotten Facebook passwords from all popular Web browsers including enhanced-security Internet Explorer 7 to 9.

About Facebook Password Extractor

Free for personal, non-commercial use, Facebook Password Extractor can instantly reveal cached login and password information to Facebook accounts. Supporting all versions of Microsoft Internet Explorer including IE9, Mozilla Firefox including Firefox 4, Apple Safari up to version 5, Opera up to version 11, and Google Chrome up to version 11, Facebook Password Extractor is the first free Facebook recovery tool to display multiple Facebook logins and passwords instantly and automatically.

Facebook Password Extractor supports enhanced security model used in Internet Explorer 7.. by including a small database containing exact Web addresses of all possible Facebook login pages. The enhanced security model in latest versions of MS Internet Explorer makes it impossible to access stored passwords without having an exact URL of a corresponding Web page.

Based heavily on [Elcomsoft Internet Password Breaker](#), Facebook Password Investigator lacks the ability to recover passwords to other social networks, email accounts or instant messengers. Customers who need accessing Twitter, Gmail, Hotmail, POP3/IMAP, or instant messenger passwords are encouraged to download the much more advanced Elcomsoft Internet Password Breaker.

Pricing and Availability

Facebook Password Extractor is free of charge for personal, non-commercial use, and is immediately available.
